### **Hash Functions and Hash Tables - Vrije Universiteit Amsterdam**

What is a good Hash Function? Hash functions should have the following properties: I Fast computation of the hash value (O(1)) I Hash values should be distributed (nearly) uniformly: I Every hash value (cell in the hash table) has equal probability I This should hold even if keys are non-uniformly distributed The goal of a hash function is: I 'disperse' the keys in an apparently random way
